## **Ball State University, IN**

*Testimonial*

At Ball State University, we are really excited about using the new Lotus Pro product as an alternative to harsh chemicals when cleaning our residence hall buildings. We're seeing great results in how well the system works, and want to help you share this with other potential clients. Our students working as part of our digital media team have produced a video that we would be happy to share with you for your Testimonial page of your Web site.
